Ellis medical records

Sample matter PI-2026-014

Fictional plaintiff personal injury records

PDF page 1 is the cover. Clinical records begin on PDF page 2.

One follow-up record is an image-only scan.

Bates: ELLIS-0000

Emergency department visit

Date of service: 04/07/2026

Provider: Harborview Medical Center

Patient: Morgan Ellis

Event: Emergency department visit

Summary: Patient reported neck stiffness and right shoulder pain after a rear-end collision.

Findings: Exam noted cervical paraspinal tenderness. Shoulder range of motion was limited by pain.

Plan: Discharged with instructions for follow-up if symptoms persisted.

Cervical spine X-ray

Date of service: 04/08/2026

Provider: Northbank Diagnostic Imaging

Patient: Morgan Ellis

Event: Cervical spine X-ray

Summary: No acute fracture or malalignment was identified on cervical spine radiographs.

Findings: Mild straightening of the cervical lordosis was described.

Plan: Clinical correlation was recommended.

JUNIPER FAMILY PRACTICE

CLINICAL ENCOUNTER RECORD

Date of service: 04/14/2026

Provider: Juniper Family Practice

Patient: Morgan Ellis

Event: Primary care follow-up

Summary: Ongoing neck and shoulder symptoms were documented at follow-up.

Findings: The patient reported difficulty sleeping and working at a computer.

Plan: Referral to physical therapy was placed.

Bates: ELLIS-0003

SYNTHETIC TRAINING RECORD

Physical therapy evaluation

Date of service: 04/22/2026

Provider: Alder Physical Therapy

Patient: Morgan Ellis

Event: Physical therapy evaluation

Summary: Initial evaluation documented limited cervical rotation and pain with overhead reach.

Findings: Baseline home activity and functional limitations were recorded.

Plan: Home exercises and two visits per week were planned.

Physical therapy reassessment

Date of service: 05/06/2026

Provider: Alder Physical Therapy

Patient: Morgan Ellis

Event: Physical therapy reassessment

Summary: Cervical rotation improved and intermittent right shoulder pain persisted.

Findings: The patient reported completing the home exercise program most days.

Plan: Continue the plan of care and reassess in two weeks.
